Prioritization Criteria

Floodwater inside structure- Repeat flooding of developed site - Lot fully flooded - Vacant property - Access blocked by flood waters for greater than 24 hours - Structural damage caused by water standing against it - Structure does not meet current building code - Located in the 10-year flood-plain - Located in the 25-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - HOUSEHOLD COMPOSITION Elderly - Severe medical problems - Severe medical problems - Handicapped/Disabled -		
Repeat flooding of developed site - Lot fully flooded - Vacant property - -1 Access blocked by flood waters for greater than 24 hours - Structural damage caused by water standing against it - Structure does not meet current building code - Located in the 10-year flood-plain - Located in the 25-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - HOUSEHOLD COMPOSITION Elderly - Severe medical problems - Septic tank inundated for greater than 24 hours - 1	STRUCTURAL CONDITION	PRIORITY POINTS
Lot fully flooded - Vacant property - 1 Access blocked by flood waters for greater than 24 hours - Structural damage caused by water standing against it - Structure does not meet current building code - Located in the 10-year flood-plain - Located in the 25-year flood-plain - Located in the 100-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - Severe medical problems - 3 Severe medical problems -	Floodwater inside structure-	10
Vacant property1 Access blocked by flood waters for greater than 24 hours - 3 Structural damage caused by water standing against it - 3 Structure does not meet current building code - 2 Located in the 10-year flood-plain - 5 Located in the 25-year flood-plain - 1 Septic tank inundated for greater than 24 hours - 1 Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Repeat flooding of developed site -	5
Access blocked by flood waters for greater than 24 hours - 3 Structural damage caused by water standing against it - 3 Structure does not meet current building code - 2 Located in the 10-year flood-plain - 5 Located in the 25-year flood-plain - 1 Septic tank inundated for greater than 24 hours - 1 Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Lot fully flooded -	4
Structural damage caused by water standing against it - Structure does not meet current building code - Located in the 10-year flood-plain - Located in the 25-year flood-plain - Located in the 100-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - HOUSEHOLD COMPOSITION Elderly - Severe medical problems - 3 HOUSEHOLD COMPOSITION Severe medical problems -	Vacant property -	-1
Structure does not meet current building code - 2 Located in the 10-year flood-plain - 5 Located in the 25-year flood-plain - 3 Located in the 100-year flood-plain - 1 Septic tank inundated for greater than 24 hours - 1 Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Access blocked by flood waters for greater than 24 hours -	3
Located in the 10-year flood-plain - Located in the 25-year flood-plain - Located in the 100-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - Severe medical problems - 3	Structural damage caused by water standing against it -	3
Located in the 25-year flood-plain - Located in the 100-year flood-plain - Septic tank inundated for greater than 24 hours - Well contaminated for greater than 24 hours - Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - Severe medical problems - 3 Located in the 25-year flood-plain - 1 New House of the 100-year flood-plain - 1 Septic tank inundated for greater than 24 hours - 1 Permanent well contamination - 2 Severe medical problems -	Structure does not meet current building code -	2
Located in the 100-year flood-plain - 1 Septic tank inundated for greater than 24 hours - 1 Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Located in the 10-year flood-plain -	5
Septic tank inundated for greater than 24 hours - 1 Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Located in the 25-year flood-plain -	3
Well contaminated for greater than 24 hours - 1 Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Located in the 100-year flood-plain -	1
Permanent well contamination - 1 HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Septic tank inundated for greater than 24 hours -	1
HOUSEHOLD COMPOSITION Elderly - 2 Severe medical problems - 3	Well contaminated for greater than 24 hours -	1
Elderly - 2 Severe medical problems - 3	Permanent well contamination -	1
Elderly - 2 Severe medical problems - 3		
Severe medical problems - 3	HOUSEHOLD COMPOSITION	
	Elderly -	2
Handicapped/Disabled - 5	Severe medical problems -	3
	Handicapped/Disabled -	5
